CONFERENCE OVERVIEW
Due to interest in the growing oil, gas and mining sectors in East Africa, there is a demand for a dedicated event to help boost these sectors. The first Oil, Gas & Mines Africa is an international event that will feature a two-day conference and associated three-day trade exhibition. It is aimed at providing a platform for professionals, companies and stakeholders to learn and understand the growth potentials of the countries in the East Africa region and to showcase the newest products, services and technologies of companies in order to encourage business, improve operations and attract investment.

TECHNICAL PROGRAMME
The format of the conference comprises a mixture of invited presentations and contributions selected from open submissions.
