ABOUT THE CONFERENCE

Continuing from our highly successful third geological conference in February 2017, AAPG, EAGE and MGS have great pleasure in organizing a fourth conference in Yangon from 13-15 November 2018.

Levels of exploration activity have remained high with new exploration and appraisal wells being drilled, discoveries being made and 2D/3D seismic being shot.

Benefits of Attending
While in some areas that were licensed in 2014, exploration is still in the pre-drill phase, in other areas activities have progressed beyond first discoveries to an appraisal phase. As data is acquired, the understanding of the petroleum systems, both within industry and within academia, is enhanced and the full oil and gas potential is unleashed.

This conference will provide the opportunity to understand the significant progress made over the last 20 months and network and share experiences with colleagues. The conference will feature technical sessions on the following topics of interest:

- Regional Geology and Tectonic Evolution
- Depositional Systems from Source to Sink
- Petroleum Systems and Plays
- Field Developments
- Risk Reduction/Management
- G&G Operations (Wells and Seismic)
- Innovation and Emerging Technologies
