OVERVIEW

To meet the Paris Agreement's ambition on tackling climate change, large scale implementation of Carbon Capture and Storage (CCS) is considered essential. For successful realisation of CCS, it is vital to build confidence that injected CO₂ is permanently and safely retained in the sub-surface and that CO₂ storage can be deployed at the required scale. This has been investigated in several research initiatives during the last decade and the objective of this workshop is to present key advances made, discuss remaining technology gaps and review a way forward.

The workshop will address state-of-the-art insights on overall integrity of CO₂ storage including subsurface formation characterization, wells & infrastructure integrity, storage capacity & pressure management, monitoring & remediation, and CO₂ EOR. Non-technical topics such as risk communication, social & regulatory issues, and resource required to meet the challenges to safely implement large scale CCS will also be covered.

The workshop will explore the need to increase communication, share gained experience and knowledge as well as lessons learned from various field and demonstration projects worldwide. Furthermore, it will address the need to develop international scientific workforces in order to tackle specific challenges, as well as methods and tools that can demonstrate a safe and environmentally sound future for CO₂ storage developments.

ABOUT UTRECHT

With a population of more than 338,000, Utrecht is the fourth largest city in the Netherlands. Utrecht is located in the very heart of the Netherlands, where the country's road and rail networks intersect. Utrecht Central Station is the country's largest train junction station and the city has one of the highest bicycle densities in the Netherlands. Utrecht's wide range of degree programmes attracts many students. The monumental buildings, cellars, old churches and the Dom Tower set the mood for the city. With the Tivoli Vredenburg music venue, museums like the Railway Museum and festivals such as the Netherlands Film Festival, the city offers cultural entertainment for everyone.

"The workshop will address state-of-the-art insights on overall integrity of CO₂ storage"

REGISTRATION

You can still register on-site for this workshop at the registration desk. Find below an overview of the registration fees.

REGISTRATION FEES

REGISTERED AND PAID	On-site
EAGE Member	€ 745
Non-member	€ 845
EAGE student member	€ 250
Student non-member	€ 295

All fees are in EUR(€). One Euro of your total registration fee is donated to the EAGE Green Fund. All Fees include the Full Workshop package with Workshop Reception and Workshop Dinner.

- EAGE Members: To qualify for the EAGE member registration fee, your EAGE membership fees for 2018 must have been paid and confirmed. The processing time for membership applications or renewals is 10 working days. EAGE membership runs from January through December. Membership applications or renewals received in October, November and December will automatically be considered for the next calendar year and activated (or reactivated) on 1 January.
- EAGE Non Members: The non-member fee includes EAGE membership for 2018 and 2019.
- EAGE Students: To qualify for the reduced student registration fee: Students must be enrolled in a full time study programme at a recognized university or institute. The registration must be accompanied by a copy of a student ID card and/or official proof of enrolment. Please note: Student non-members cannot be older than 34 years of age (when registering).

SOCIAL PROGRAMME

Workshop Reception

Wednesday 21 November - 18:00 - 20:00

The Workshop Reception will be held on Wednesday evening in the workshop venue (Carlton President Hotel) in Focus 2 room.

The Workshop Reception is a great opportunity to get to know your fellow participants and further discuss the workshop topics in an informal setting. Typical Dutch drinks and finger food will be served.

Workshop Dinner

Thursday 22 November 2018 - 19:30 - 22:30

On Thursday evening all confirmed participants are welcome to attend the Workshop Dinner, taking place at Zuiver Restaurant in Leidsche Rijn - Utrecht. Zuiver Restaurant is a special and original space, located in an old farm with a very beautiful environment. The international cuisine offers fresh ingredients prepared according to the season of the year. We invite you to join all other workshop participants in this great experience.

The bus will leave from the workshop venue directly to the restaurant at 19:00. The bus will only be available for participants that have confirmed by email to Lara at lml@eage.org. Please bring your badge with you.
